

BA Series

Product Description

SALIRONE innovates not only the revolution & green composite material, but also brings durability and characteristics together with a variety of colors & texture, that creates a even better elegant fashion world.

Product Features

- Safe & Soft skin touch
- Antiallergic
- Anti-bacterial & Mould proof
- High/Low Temperature Resistance
- Extraordinary Low Permanent Elongation
- Colorful and stylish
- Green protective and environmental friendly

Color and texture

Custom colors and textures are available upon request.

Typical Applications

Clothes, handbag, shoes...

Specification

Width: 1370mm

Put-up: 50m R.O.T.

Substrate Material Type: Microfiber

Substrate Material Thickness: 0.5~0.8mm

CHARACTERISTICS VALUE

Tensile Force	longitudinal	≥200N
	Transverse	≥100N

Tensile Elongation	longitudinal	≥60%
	Transverse	≥150%

Tear Force	longitudinal	≥25N
	Transverse	≥25N

PH	4.0~8.5
----	---------

Formaldehyde	<20ppm
--------------	--------

RoHS 2.0	Comply
----------	--------

REACH 175 Item	Comply
----------------	--------

* All data value based on substrate material thickness is 0.5mm.

* All data shown only for basic reference, and not as specification or warranty.

CHARACTERISTICS VALUE

Tensile Force	longitudinal	>500N
	Transverse	>300N

Tensile Elongation	longitudinal	>80%
	Transverse	>130%

Tear Force	longitudinal	>55N
	Transverse	>55N

Flexibility	longitudinal	>90mm
	Transverse	>80mm

Friction resistance color friction	Dry	>4 Grade
	Wet	>4 Grade

Color Fastness to Light	>4 Grade
-------------------------	----------

Odor	<3 Grade
------	----------

Abrasion Resistance (CS-10, 1000g, 500r)	
No Damage, Peel off and coating layer	

Folding Durability (20000 cycle)	
No Crack and coating layer	

CHARACTERISTICS	VALUE
PH	4.0~8.5
Formaldehyde	<20ppm
RoHS 2.0	Comply
REACH 175 Item	Comply

* All data value based on substrate material thickness is 0.8mm.

* All data shown only for basic reference, and not as specification or warranty.
